New user

Username

test_user

Password

.....

Retype Password

.....

E-mail

tester@smartoffice.expert

Networks

MyScreens x

Default network

MyScreens ▼

First Name

John

Last Name

Doe

Create

- username - login for the user
- password / retype password - password for the account
- email - user email
- networks - default value should be kept (used in multiple networks configuration, not used in SmartOffice module)
- default network - default value should be kept
- first name / last name - display name for the user

4. After creation you will be redirected to user permissions

How to change user permissions

1. Go to "Settings" -> "Permissions"

The screenshot displays the URVE application's user interface. On the left is a vertical sidebar menu with icons and labels for various sections: Smart Office, Settings (highlighted), History, Permissions, Areas, Dynamic, Network, Modules, Server settings, Deployment, Help, and a user profile section for 'admin!'. The main area shows the 'Permissions' configuration page. At the top right of this page are links for 'Actions' and 'Assign access'. Below the header is a table listing permissions. Each row contains a permission name, an icon representing its category, and a red button labeled 'Edit'. The permissions listed are: Smart Office, Dashboard, Configurator, Orders, Statistics, Issues, Audit, Playlists list, Media, Settings, History, Permissions, Areas, Dynamic, Account, and Network.

Permission	Category Icon	Action
Smart Office		Edit
Dashboard		Edit
Configurator		Edit
Orders		Edit
Statistics		Edit
Issues		Edit
Audit		Edit
Playlists list		Edit
Media		Edit
Settings		Edit
History		Edit
Permissions		Edit
Areas		Edit
Dynamic		Edit
Account		Edit
Network		Edit

2. In top right corner click "Assign access" and select user

2a. Adding permissions to specific menu

To add permissions, You can click on checkbox to corresponding menu entry. It will grant user access to that menu entry. Some of the checkboxes can be disabled. It can be caused by roles.

[illegible]

2b. Adding permissions via roles

Go to "*Roles*" tab and click checkbox in corresponding role. Roles definition are below.

URVE		Permissions	Permissions	Roles	Playlists	Players	Areas	Actions	John Doe (test_user)
Smart Office	Superuser role - all access (built-in role)								<input type="checkbox"/>
Settings	Limited area								<input type="checkbox"/>
History	Areas full access								<input type="checkbox"/>
Permissions	Rola użytkownika								<input checked="" type="checkbox"/>
Areas	Smart Office: Basic access to module								<input checked="" type="checkbox"/>
Dynamic	Smart Office: Full access to module								<input type="checkbox"/>
Network	Smart Office: Access to location settings								<input type="checkbox"/>
Modules	Smart Office: Access to statistics								<input type="checkbox"/>
Server settings	Smart Office: Access to extras orders								<input type="checkbox"/>
Deployment	Smart Office: Access to issues								<input type="checkbox"/>
Help	Smart Office: Access to alerts								<input type="checkbox"/>
Hello, admin!	Smart Office: Access to groups								<input type="checkbox"/>
	Smart Office: Access to rules								<input type="checkbox"/>
	Smart Office: Access to users								<input type="checkbox"/>
	Smart Office: Managing (deleting) reservations								<input type="checkbox"/>

- *Superuser role - all access (built-in role)* - grants full access to the system, user with this role cannot be deleted
- *Limited area* - changes area configuration to basic (cannot change dimension)
- *Areas full access* - grants access to every area
- *Rola użytkownika* - user role, grants access to assigned playlists,
- *Smart Office: Basic access to module* - grants access to statistics and dashboard
- *Smart Office: Full access to module* - grants full access to smartoffice module (also requires basic access to function properly)
- *Smart Office: Access to location settings* - grants access to manage locations, resources, statistics, SmartOffice device configuration, resource keywords
- *Smart Office: Access to statistics* - grants access to SmartOffice statistics
